EXPERIENCE

CODEXINTERN – Front-End Developer Intern

Jun 2025 – Jul 2025 | Remote

- Built 20+ reusable React.js components adopted across the codebase, reducing feature development time by (25-30%).
- Integrated 10+ RESTful APIs via Axios with async/await, cutting data-fetch latency by (10-25%) and improving UI responsiveness.
- Led pixel-perfect Coding Ninjas website clone (HTML/CSS/JS) with responsive layouts and interactive components.

PROJECTS

E-Commerce Platform

Mar 2026 – Apr 2026

React.js • Vite • JavaScript • React Context API • REST APIs • Git

- Architected multi-role platform with 3 dashboards (Buyer, Seller, Admin) using React.js + Vite, enabling real-world marketplace workflows.
- Implemented JWT-based Auth & session management with protected routes, enforcing tamper-proof RBAC across all user flows.
- Integrated React Context API for global state management, eliminating prop drilling across 3 dashboard layers and cutting re-renders by 20%.
- Designed 15+ scalable, reusable components (DRY principles) with fully responsive UI across desktop, tablet, and mobile.

Work Force Task Automation

Nov 2025 – Mar 2026

Java • Spring Boot • REST APIs • Microservices • MySQL • JIRA

- Designed Spring Boot REST APIs with JIRA integration to auto-fetch & categorize issues hourly, boosting efficiency by 30%.
- Automated status updates, team assignments, and priority-based auto-comments, reducing manual reporting effort by 40% (8 hrs/week).
- Built normalized MySQL schema with indexed queries, achieving sub-100ms response time for all hourly JIRA sync operations.
- Delivered 4 backend microservice modules independently end-to-end within 5 months — from design to deployment.
